

About Pervasic

Pervasic leads the UK market in advanced mobile data solutions. Based in London, the company operates in the UK and Europe.

With Pervasic solutions, clients have simply transformed the way they do business. Organisations have realised considerable performance gains, achieved greater control across their mobile workforces, and gained critical competitor advantage.

Delivering tangible business value

With a wholly pragmatic approach and fast speeds of deployment, Pervasic has an unrivalled experience in business-driven implementations.

Unlike many other providers, the company offers a comprehensive end-to-end service that includes planning, implementation and rollout. We ask the right questions from the start, and robust evaluation measures provide a clear picture of what mobilisation means to your bottom line. For finance, operations, IT and HR managers, the business case is compelling.

Setting the industry benchmark

Pervasic solutions are recognised across Europe as the benchmark for quality, value, delivery and innovation in the mobile data market. They are being used by thousands of operatives working for a wide range of industry-leading corporations. We've worked with all the major European mobile operators, systems integrators, software vendors and resellers.

The company has solid backing from Frontiers Capital, and benefits from a strong advisory board with members from IBM, Motorola, NEC and Symbian.

MobileOne®

Industry-leading mobile data platform

All Pervasic solutions are driven by our durable and versatile MobileOne® platform. A truly sophisticated communications and data management tool, it continues to lead advancements in mobile data technology.

Unlike most providers, Pervasic is able to deliver an end-to-end managed service – including application development, systems integration, deployment, training, and in-life service and support. Critically, MobileOne® supports all back-office systems and multiple systems. It can deliver powerful unified platforms where other point solutions fall short.

- ✓ Rapid development of customised applications
- ✓ 24/7 operation, monitoring and system checks
- ✓ High data integrity and security for on and off-line work
- ✓ Compatibility with all major mobile networks and Windows-equipped PDAs
- ✓ No required hardware or dedicated communication links

High performance and security

On the front line, the powerful MobileOne® platform routes job information through to the field instantaneously. Workers use PDA hand-held devices to complete tasks and send back results as they happen.

Behind the scenes, any organisation is guaranteed maximum security and data integrity. Over and above robust security and encryption features, the platform runs on servers housed in secure data centre facilities and benefits from 24/7 monitoring.

Businesses served

Custom-made for your trade

Pervasic's industry-leading solutions already benefit thousands of mobile operatives working in some of the most influential organisations and across a wide range of sectors and disciplines.

- Asset Management
- Field Service
- Housing Maintenance
- Mobile Sales & CRM

AppForce™ Business Solutions are designed to meet the precise requirements of specific business types and sectors. Our pragmatic approach and unrivalled corporate experience allows us to deliver applications that are practical and user-friendly for workers and powerful tools for management.

Industry best practice

Pervasic solutions represent industry best practice across each sector they cover, and also integrate with all leading workflow management applications. Solutions combine genuine configurability with excellent value for money and speed of deployment.
